Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 27, 2006, has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 62, 64, 66, and 68 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Each claim has a parent claim that recites, "wherein the warning allows the user to determine whether to store the captured image." Each of claims 62, 64, 66, and 68 also recites, "the control unit determines ... whether to start the recording process or not" (or some variation

Art Unit: 2622

thereof). The specification, however, does not describe how the user and the control unit both make the same decision.

Figure 4, for instance, shows that the recording process occurs in step S35, which is shown in detail in Figure 7.

In step S94, the user is asked whether he or she wishes to store the image. This step corresponds to the above-cited limitation in the independent claims. However, there is no step that corresponds to having the *control unit* determine whether to start the recording process (i.e., the process shown in Figure 7), because, as shown in Figure 4, the recording process is always performed. In other words, the specification provides for a decision to be made (by the user) as to whether *storage* occurs but does not provide for any decision to be made as to whether the *recording process* occurs.

Allowable Subject Matter

4. Claims 61, 63, 65, and 67 are allowed.

Regarding each of these claims, no prior art could be located that teaches or fairly suggests an image capturing apparatus or method that determines whether to issue a warning to a user or not based on at least a first white balance value representing a white balance captured before a switch is operated and a second white balance value representing a white balance captured after the switch is operated, wherein the warning allows the user to determine whether to store the captured image.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Whipkey, whose telephone number is (571) 272-7321. The examiner can normally be reached Monday through Friday from 9:00 A.M. to 5:30 P.M. eastern standard time.
